## DR. BOYD'S Medical and Surgical Institute

Guarantees to Cure the Following Diseases:

DR. B. Y. BOYD.

**Diseases of Men.**  
Wasting Weakness, Nervous Debility, Lack of Confidence, Lost Energy, Startling Errors, Physical Decay.  
Bladder, Urinary and Rectal Inflammation, Incontinence, Painful, Difficult, Stricture, Discharges, Sores, Piles, Fistula, Ulcers.

When others have failed we have successfully treated Catarrh, Chest and Throat Diseases.

**ELECTRICITY** Our Institute is equipped with the latest and most powerful Galvanic and Faradic Batteries in the West. We make a scientific application of Electricity in all its various forms to all diseases amenable to its action.

**Diseases of Women.**

Dysmenorrhoea, Irregular Menstruation, Leucorrhoea, Discharges of Ovaries, Protrusion, Ulceration, Displacements, Tumors, etc.

Dr. J. J. Littlefield.

Who has for many years made Electricity, as applied to chronic diseases, a specialty. Will have charge of this department and also the diseases of women, and will have charge of the latest and most powerful Galvanic and Faradic Batteries in the West. We make a scientific application of Electricity in all its various forms to all diseases amenable to its action.

**Dr. Boyd's Medical and Surgical Institute,** 155 North Main street, Wichita, Kansas.

## THE KANSAS STATE MEDICAL AND SURGICAL INSTITUTE AND SANITARIUM.

Reorganized and chartered under and by virtue of the Laws of the State of Kansas. Permanently established at Wichita, for the treatment of all chronic diseases, and for the instruction of students in medicine and surgery. The Institute has a large and complete hospital, and is equipped with the latest and most powerful Galvanic and Faradic Batteries in the West. We make a scientific application of Electricity in all its various forms to all diseases amenable to its action.

Dr. J. J. Littlefield, President of the Institute, has been elected President of the Kansas State Medical Association, and will have charge of the department of medicine and surgery. The Institute has a large and complete hospital, and is equipped with the latest and most powerful Galvanic and Faradic Batteries in the West. We make a scientific application of Electricity in all its various forms to all diseases amenable to its action.

## S. E. NOYES & CO. NEW SPRING

## DRESS -:- GOODS

FOR EASTER.

NEW FABRICS, NEW TINTS,

Selections from the Importations of Sharpless Brothers, Philadelphia.

We have just opened a full line of the new and Popular Fabric

## Taffetta de Laine.

These goods are in very active demand; very appropriate to the approaching season. They can be worn from early spring almost to mid-summer. It will soon be impossible to obtain the coveted colors; our stock of them is not large; make your selections now when all the best shades are at your disposal. Our prices on these goods are very low as usual.

We are Also Showing an Assortment of

Serge de Lyon and Sublimes,

In Changeable and Solid Colors.

## Dress Gingham

An entirely new stock, all of this season's production, below market value.

## Ladies Ready Made Suits and Wraps

We are in daily receipt of novelties in these goods, only one of a kind, and will show them with pleasure.

We sell at lower prices than any other house in the state.

S. E. NOYES & CO.

120 North Main St.

## Spring -:- SEEDS

FOR THE GARDEN, FARM AND FIELD.

Onion Sets, Potatoes and Sweet Potatoes; Plants in season; seed for making; list. ROSS BROS., 319 E. Douglas, Wichita.

## DUNN'S REVIEW.

NEW YORK, Feb. 24.—R. G. Dunn & Co.'s Weekly Review of Trade says:

"While \$3,000,000 in gold was shipped this week and half a million is expected to go today there is no increase in the apprehension about the monetary future, and the business world pays little attention to the action of congress, though the increasing probabilities of an extra session are regarded with some interest."

"Speculation in products has not been very active. Wheat is 1 cent lower, with sales of only 10,000 bushels, and corn and pork products are scarcely changed. Cotton is 1/2 cent higher, notwithstanding the continuance of the English strike, but receipts are small and the probable failure of the anti-option bill affects trade more than the conditions of supply and demand. Cattle are active at Chicago."

"There is still the weakest of the great industries, and pig not of the best brand is a shade weaker than a week ago. The business in bars is unsatisfactory; plates are very weak, while the structural works are full of orders, competition is so sharp that prices have little chance to improve. Copper and tin remain quiet, and lead is in the boat and some trade in the higher cost of leather causes manufacturers to urge better prices, which are extremely low."

"The treasury has not materially changed its balances this week, in spite of the gold shipments. The exports of merchandise from New York are a little more satisfactory, closely approximating last year's for February thus far. The imports continue to be very heavy, and the outflow of gold must be expected to remain heavy so long as the present trade conditions last, unless foreign purchases of American securities should come to balance the account."

"The business failures occurring throughout the country during the last seven days number 29. For the corresponding week of last year the figures were 29."

## ACQUIRED A BATTLESHIP.

NEW YORK, Feb. 24.—The navy department has completed the designs of a powerful battery for the International Navigation company's steamer, New York.

The battery will consist of twelve 6-inch breech-loading rifles, placed one on each bow and quarter, and four on either broadside. In addition there will be a secondary battery consisting of twenty 6-pounder rapid-fire guns, placed on the main and hurricane decks, and eight 1-pound rapid-fire guns mounted in the tops. Each of the two masts of the ship will be given double tops. Each top will contain two 1-pounder guns. On the extremities of the masts, in a position commanding a sweep fore and aft, and in the water line, will be placed two Gatling guns. Furthermore, it has been planned to give the New York a brace of submarine guns in the bows, and positioned so as to discharge their projectiles at a depth of ten feet below the water line.

## ROCKEFELLER ARRESTED.

WILKES BARRE, Pa., Feb. 24.—Ed. Barker Rockefeller is arrested last year on complaint of his creditors. He gave bail and was released.

## WASHINGTON.

### FARMER HATCH'S PET MEASURE ON THE RAGGED EDGE.

The House Turns a Deaf Ear to Another Appeal for Consideration of the Anti-Option Bill.

The Senate Refuses to Strike Out of the Legislative Bill the Paragraph Abolishing the Utah Commission.

The Gold Balance in the Treasury Shows a Change for the Better—A Minnesota Congressman Discovers That the Sherman Bond Amendment Will Result in the Retirement of Greenbacks.

Hostility to the Treaty With Hawaii.

WASHINGTON, Feb. 24.—In the house this morning Mr. Holman asked for consent for an amendment to the anti-option bill, to strike out of the bill the paragraph abolishing the Utah commission.

Mr. Bland objected, denouncing the Sherman amendment as a "job," and caused the reference of the bill to the committee of the whole.

Mr. Peck of Kansas moved that the house go into committee of the whole for the consideration of the Indian appropriation bill. Mr. Hatch of Missouri opposed the motion with the anti-option bill, but after some debate, the house determined—147 to 84—to resume consideration of the Indian appropriation bill.

The paragraph appropriating \$250,000 for arrears of interest claimed by the Chickasaw Indians was struck from the bill. The appropriation for the support of Indian schools was increased from \$1,000,000 to \$1,075,000.

At 5 o'clock Mr. Hatch, who had been presiding, left the chamber for a long and strong plea for the anti-option bill. All knew, he said, that the friends of the demonetization of silver and the enemies of the anti-option bill had conspired to carry their point, and were using the appropriation bill to further their conspiracy.

Mr. Coombs called Mr. Hatch to order, his point being that Mr. Hatch was impugning the motives of members.

Mr. Hatch said that he impugned no one's motives; he was simply explaining the position of the anti-option bill.

The committee rose and Mr. Holman asked that there be formal non-concurrence in the senate amendments to the anti-option bill, with the exception of the Sherman amendment.

Mr. Hatch objected.

The house then took a recess, the evening session to be for the consideration of private pension bills.

### SENATE.

WASHINGTON, Feb. 24.—Nearly the whole time of the senate today was consumed in consideration of the legislative appropriation bill. An amendment striking out the paragraph abolishing the Utah commission was defeated. An amendment providing for thirty-day clerkships to senators who are not chairmen of committees. The total cost of these clerkships will be \$44,277 per year. An amendment increasing the appropriation for the civil service commission was adopted.

Without making further progress with the bill, the senate adjourned.

### THE HAWAIIAN TREATY.

WASHINGTON, Feb. 24.—A strong feeling of hostility to the Hawaiian treaty is entertained by some of the leading members of the house. A declaration of resolution expressing the conviction that no territory should be acquired without the approval of both houses of congress, will probably be presented to the house by the committee on ways and means, of which committee a sub-committee has in charge the Springer Hawaiian treaty resolution. The sub-committee had the matter under discussion this afternoon at an executive session.

WASHINGTON, Feb. 24.—Senator Allison is now counted among the opponents to the ratification of the treaty to annex the Sandwich Islands. The defection of the Iowa senator is regarded as a serious change of sentiment that is going on in the senate and, to some extent, in the house on the annexation proposition.

There is a disposition generally to go more circumstantially to the bottom of the case and cause delay. Ultimately such a treaty as the one pending may be ratified. But it is altogether problematic whether anything will be accomplished this session, with only nine or ten legislative days remaining.

Mr. Allison, as chairman of the appropriation committee, antagonistic. There are almost that many appropriation bills to dispose of, and important measures, like the Hawaiian treaty, are in their turn, whose friends are jealous of every hour diverted from their measures.

It will be seen that there is no hope for the consideration of any new legislation until after the appropriation bills have been disposed of. When that is done the friends of annexation will have to settle for time with the advocates of bills having the right-of-way next after these.

Senator Allison's opposition is primarily due to the anxiety he feels in seeing the appropriation bill out of the way before a measure as important as annexation is allowed to take up the time of the senate.

The Democratic senators are nearly a unit in their opposition to the treaty. Only five of them are in any way disposed to favor the extension of the power of the United States over the Sandwich Islands. These are Senators Morgan, Voorhees, Gilman, Sherman and Call, and even some of these are uncertain about the advisability of going to the length of annexation. Under these circumstances the consideration of the treaty would precipitate a long debate, which could easily be extended so as to make it impossible to secure a vote on the subject. It is believed that this condition of affairs has been deliberately brought about by the Democrats with the intention of causing the necessity of the incoming administration completing a work commenced under the present. If the Hawaiian treaty is to be annexed to the United States, or if a protectorate is to be extended by this country over the islands during the next four years, the Democrats desire that the negotiations to that end shall be made through the Democratic administration.

Senators Thurston, Lodge and Carter, members of the special Hawaiian committee, have determined to remain in Washington until the senate disposes of the treaty of annexation now pending before it, one way or another. It has been printed that they are to sail for Honolulu on the third of March next, but within the last few days they have changed their minds. The coming to the United States of Princess Kaiulani in company with T. H. Davis who has been accompanying her education in England is supposed to have been upon it. It is reported that Mr. Davis, acting on behalf of the princess,

### THE SHERMAN AMENDMENT.

WASHINGTON, Feb. 24.—Representative Lind of Minnesota has discovered in the Sherman bond purchasing amendment to the sundry civil bill an objection which he says will defeat the bill unless the senate recedes. He claims that under this amendment the secretary of the treasury will have power to retire the greenbacks in circulation of \$200,000,000. The Sherman amendment provides for the issue of bonds under the redemption act of 1875. That act provided for the cancellation of the greenbacks when they were redeemed. There was an amendment to the redemption act, passed early in the 80's, which provided that the greenbacks so redeemed might be reissued. The Sherman amendment makes no reference to the amendatory or recess act, and Mr. Lind holds that the currency will be contracted to the amount of the redemption. As there is nothing in the Sherman amendment to prevent the issue of national bank notes upon the bonds it provides for, the result of the enactment of the Sherman amendment will mean that greenbacks will be exchanged for bonds by capitalists who prefer 3 per cent investments in safe United States securities, and that the currency will be contracted to the amount of the present greenback circulation. He says the amendment can never be agreed to in the house.

### THE GOLD BALANCE.

WASHINGTON, Feb. 24.—The treasury situation shows a decided improvement today. Only \$500,000 in gold was ordered for shipment tomorrow. At the same time during the week the government has increased its gold holdings \$145,000, which inspires a belief that the tide has been changed. With tomorrow's shipment of \$500,000 deducted, the treasury has a net balance of \$3,800,000 in free gold.

COLUMBIA, O., Feb. 24.—Allen G. Thurman has a plan which, he thinks, will solve the financial problem and dispose of the currency question to the satisfaction of all. His proposition is that silver dollars shall be the basis for the currency in circulation. The banks are to be required to deposit in the United States treasury 90 per cent in such dollars, upon which they are to be permitted to issue silver certificates. These would always insure payments and give the banks a profit on their circulation, which they do not now enjoy. Mr. Thurman argues that silver and gold would, with free coinage, and this amendment to the national banking law, be at a parity in twenty-four hours, the strife between the two metals ceases.

WASHINGTON, Feb. 24.—The American Bimetallist league closed its sessions today. J. H. Tibbles, a farmer from Nebraska, addressed the league. He said that the farmers had been too lately to keep out of politics. Their answer was, "You go to hell. We propose to vote as we think, and in our own interests."

J. E. Dean, a farmer from New York, also spoke from the agricultural point of view.

A resolution was adopted providing for cooperation with the local agricultural organizations in the United States and inviting them to send delegates to future meetings of the league.

General Wadsworth was re-elected president. The time and place of holding the next annual meeting was left to the executive committee.

### JUDGE GRESHAM.

NEW YORK, Feb. 24.—The next secretary of state, Walter Q. Gresham, called on the late secretary of state this afternoon. They remained in conference an hour. Mr. Gresham said that he was in the city to see Mr. Cleveland and to see Mr. Thurman.

Mr. Gresham said that he was in the city to see Mr. Cleveland and to see Mr. Thurman. He said that he was in the city to see Mr. Cleveland and to see Mr. Thurman.
